

Statutory statement on data ethics

Contents

1. Introduction.....	1
2. The use of data	1

1. Introduction

This policy constitutes the required reporting according to the Danish Financial Statements Act §99 d.

This statement is the statutory statement on data ethics for 2022. The policy provides the framework for Lind Invest ApS and Lind Value II ethical principles and conduct in relation to data.

The companies consider data ethics in the following way:

2. The use of data

Lind Invest ApS and Lind Value II ApS do not apply advanced technologies, such as artificial intelligence or machine learning. The two companies handle ordinary data such as customer or supplier data as well as employee data. Data is treated in accordance with our policies on personal data and information security. Given the limited treatment of data, the companies believe there is no need for a policy on data ethics. The companies will assess on an ongoing basis the need for such a policy.
